

AUTOPOT COMBINATIONS

We often get customers in store interested in the Autopot Kits and Easy2grow Kits and one of the things people love about the Autopot's is the fact you can add and remove pots when circumstances change. For this reason I have given a variety of the most popular combinations and documented what size tank you need and what equipment you may require to complete the set up.

The guide that Autopot give tank wise is the following for the Autopot 1 pot kits:

47L Tank does 1– 4 15L pots
100L Tank does 1– 10 15L pots
220L Tank does 1-20 15L pots
350L Tank does 1-36 15L pots

Obviously to have a 350L tank for a 1 pot system is a bit daft but if you follow the above a guide you should not go wrong.

The guide for the Easy2Grow Kits is:

47L Tank does 1-6 8.5L pots
100L Tank does 1-20 8.5L pots
220L Tank does 1 – 45 8.5L pots
