

BLOOMBASTIC

- The Bloombastic formula contains biological minerals in combination with biological stimulants to create a one of a kind nutrient additive specifically designed for the flowering. The unique combination of elements in Bloombastic will trigger explosive sugar and bloom production that will ensure a soft, sweet flavor of the bloom.
- Bloombastic will also stimulate the enzyme process on several levels that will make your plant less sensitive to stress factors such as: warmth, dry air, high light intensity, disease, and nutrient inadequacies.
- This flowering innovation does not contain any ballast ingredients such as sodium and chlorine.
- Compared to other cocktails, Bloombastic contains at least 50% more phosphorus and potassium.
- Bloombastic can be used in combination with all irrigation systems: NFT, Ebb and Flow, Drippers, Bubblers, Aeroponics
- Using another high P-K product in combination with Bloombastic will result in overdose plants
- Bloombastic seems expensive if you only look at the sticker price. It is highly concentrated, so you only need 0.5 - 1 ml of Bloombastic per litre feed water.

Directions for use:

Bloombastic should be used in the final 4 to 6 weeks of the bloom and ripening stage of plant growth. Shake well before use.

Dosage:

Mix your usual base nutrients. (THIS PRODUCT CAN BE USED WITH ANY BRAND OF NUTRIENT INCLUDING CANNA). Then add 0.5 ml to 1.0 ml of Bloombastic per litre of water in your reservoir. Bloombastic is suitable for all sorts of cultivation substrates (soil, hydro and coco) and is suitable for all irrigation systems.

Content:

Potassium Phosphate, Potassium Hydroxide, Phosphoric Acid, Iron EDTA, Phosphorus Pent oxide and Clay mineral.

Warning:

Keep out of reach of children. Store at room temperature.

FAQ

What is Bloombastic and what does it actually do?

Bloombastic is a one bottle wonder that will transform your garden. The bloombastic formula is comprised of two very different sciences. Bloombastic is a highly concentrated

pure mineral Pk boost as well as a cutting edge plant metabolic booster. Bloombastic will elevate the over all quality and yeild of your garden.

Should I shake Bloombastic for use? If yes, why?

Yes you should always shake ALL nutrients and addives before mixing your feeding sololution. This is just good gardening practice to ensure that the product is in full soloutin before mixing.

How fast does the Bloombastic formula work?

You can typically see results within the first 5-7 days. as you increase the dose of Bloombastic you will see a more dramatic effect of the PK boost and the metabolic enhancers kicking in.

Does Bloombastic give an organic taste, or a taste what so ever to my products?

Bloombastic will not impart an unnatural taste or smell. It will however bring out the full potential of your plants genetics.

Why does Bloombastic cost so much?

Bloombastic appears to be expensive if you are only looking at the price sticker. This product is highly concentrated at 0.5 ml of Bloombastic to 1litre of feeding water. This means that a 325 ml size bottle will make almost 700 liters of feed water. That equals less than 8 pennies per dose of bloombastic! We think this is a tremendous value to our customers. Bloombastic is a very affordable way to replace several flowering products you may be currently using with a much improved result. As you are buying this product from 3CH hydroponics you will also be saving on the RRP.

Why do I get a brownish settlement in my feed water tank when I mix up Bloombastic?

The settlement that is seen in the feed tank has no impact on the effectiveness of Bloombastic. What you are seeing is clay mineral that has come out of the solution. The clay mineral is used a vehicle to keep the two different technologies that make up Bloombastic in a stable solution. The Bloombastic formula contains both mineral and biological components, the clay is an important part of our formulation. It is suggested you keep the nutrient solution in your feed tank agitated as this will minimize the residue.

How long will Bloombastic last once I have opened the bottle?

Bloombastic has proven to have a shelf life of 3 years. The shelf life may in fact be longer, we will continue to monitor our first production samples.

What type of growth medium (ex. rockwool, coco, peat) can you suggest for best results and highest yields while using your product?

Bloombastic can be used with soil, coco or hydroponic systems.

For any further hydroponic information visit www.3ch.co.uk or phone one of our stores today.
