

SYLVANIA GROLUX BULBS

SAFETY INSTRUCTIONS

SODIUM LAMPS

The following general points must be observed:

1. Switch off the electrical supply before changing the grolux bulb.
2. Any article made from glass or quartz is inherently fragile.
3. Take care at all times to protect hands and eyes from injury due to broken bulbs.

Before Use

1. Check that the Grolux bulb is the correct type for the application including wattage, voltage and circuit type.
2. The bulb must not be scratched or subjected to mechanical shocks. Either will cause breakage.

During Use

It must be noted that condensation or water splashes on the lamp may cause a hot bulb to shatter. If for any reason the outer bulb breaks the lamp must not be operated.

Disposal

When disposing of your Grolux 600w or 400w bulb please take care and dispose in a safe manner.
